McGill Reproductive Centre

Date: _____

To Whom It May Concern:

Re:

The above named patient is presently being treated for infertility at the McGill Reproductive Centre in Montreal. She will require a transvaginal ultrasound examination(s) on any day between day 2-5 of menstrual cycle:

□ **BASELINE SCAN FOR BASIC INVESTIGATION**

- Measure the volume of both ovaries (taken with two perpendicular planes, **measure and count every follicle >2mm in each ovary**)
- Documentation (picture of longitudinal and transverse views of the uterus including the cervix, body and fundus. Diameters of uterus.
- Measure the maximum thickness of endometrium (taken in longitudinal plane with endometrium seen along the entire length of the uterus)
- Documentation and measurement (in volume) of any pelvic pathology e.g. Fibroids, cysts, masses, etc.
